

6 TIPS FOR SAFE DRIVING

When you're behind the wheel of a car, driving safely should always be your top concern. It's important to know the basics of safe driving and practice them every time you're on the road.

1 Pay attention! Know where all vehicles are around you. Don't use your phone or any other electronic device while driving.

2 Don't follow too closely behind another vehicle. When you stop, you should be able to see the rear tires of the vehicle in front of you touching the road.

3 On days with good weather, drive at the posted speed limit. In bad weather/construction zones, drive slower.

4 Drive nicely. Allow other cars to merge, and follow right-of-way rules.

5 If you miss your turn/exit, do not take short cuts. Go around the block or turn at the next street and go back.

6 Make a safe driving plan. Prepare for your drive by checking directions, weather and road conditions before you leave. Adjust your seat, mirrors and climate controls before putting the car in gear.
